REXPlayer Enhanced for Laptop Users

IRVINE, CA, January 11, 2016 – MethodRed has updated REXPlayer to v1.6, which adds support for triggering slices from the computer keyboard, in addition or in place of, using a MIDI controller.

REXPlayer is a handy Rex file and slice sample player for the Mac. REXPlayer provides all the tempo flexibility you expect with Rex files in a fast, modern app that let's you play any Rex file and play the individual slices.

“Our new SliceKeys feature is great for laptop users”, says MethodRed founder Doug Hanson, “it lets you quickly audition individual REX slices directly from your computer keyboard, without needing a MIDI controller available and connected”, according to MethodRed founder Doug Hanson. “Of course, playing the slices via MIDI still works great, as well”.

Key Features

- A fast, efficient way to play any Rex file
- Play the file's slices via MIDI or your computer keyboard
- Flexible tempo: change it in realtime or lock it so all files play at your desired tempo
- Simple drag and drop operation with multiple files and folders
- Drag export to your DAW of choice

System Requirements

REXPlayer requires Mac OS X 10.10 Yosemite or later.

Pricing & Availability

REXPlayer v1.6 is available now for \$4.99 in the Mac App Store.
